Introduction to Google Colab

Google cloud's version of Jupyter notebook where you have access to resources for free.

You need to have a google account for this. After that you can go to

https://colab.research.google.com/

You can sign in into your account on the **top-right login link**.

To create a new notebook, go to file and click on New python 3 notebook

Your browser will open a new window for this.

Jupyter notebooks created in Google colab are saved into your google drive. If you want to see where it is located, you can click on file and then locate in drive. You are going to see that the notebooks will be saved in your google colab notebook. If you want to open a notebook while you are in your drive, click on your mouse right boton. A menu will show up, click in more and then choose google collaboratory.
